SUMMARY

I had an interest in computers since a very young age and the last 3 years, I've delved into numerous technologies in the process of creating numerous interesting projects, all open source. I love the process of creating and code is how I've expressed myself. Primarily a Backend developer, I've also created numerous CLI tools that supplement my development process. I keep up to date with the latest technologies and I am confident that I will bring fresh perspective to any development team. I am currently delving into the world of Machine Learning, especially the generalized applications of Machine learning in developer tools and also the low level implements of Machine Learning concepts.
