## ABOUT

Going by NoobScience online, I am a passionate developer who builds reliable and blazingly fast applications using the latest and greatest technologies. I like to keep up with trends while understanding the foundations. Currently learning Rust with a focus on reliable and memory safe applications.

## EDUCATION

Bachelor of Technology  
9.2 Aggregate GPA  
GRIET | 2022-Present

## SKILLS

### Web Technologies

- Nodejs
- React
- Javascript

### Backend Technologies

- GoLang
- Rust
- Typescript

### Databases and Tools

- PostgreSQL
- MongoDB
- Linux

## PROJECTS

- **NoobText:** FullStack Text Notes Sharing applications implementing Caching and Load balancing and Authentication
- **DocCache:** A hospital management system written with a GoLang Backend and a Next.js frontend written to be Dockerized and fast.
- **Clarity:** Clarity is the quora for your classroom. Connect with your classmates and discuss. Written using React, MongoDB and the T3 Stack.
- **Envn:** A environment secrets manager written using Rust and implementing AES256 Encryption.
- **NoobSocial:** A Full Stack Social media clone using Golang and HTMX being built live on youtube.com
